May 29, 2026

I. Executive Summary

I.1. Introduction

CoreNode Solutions Corp. is a technology-based corporation that provides customized business automation systems for modern enterprises. The company helps businesses reduce manual work by developing digital workflows for sales, customer support, lead management, and system maintenance.

I.2. Product or Service

- Order Node
- Support Node
- Social Node
- Managed Core Maintenance

I.3. Market

- Micro, Small, and Medium Enterprises (MSMEs) in Metro Manila
- E-commerce retailers and online sellers
- Professional service providers such as consultants and agencies
- Digital content creators and influencers

I.4. Competition

- GoHighLevel
- Zapier
- Make.com
- HubSpot

I.5. Opportunity

Many MSMEs and online businesses still rely on manual encoding, repetitive customer replies, and scattered sales records. CoreNode Solutions Corp. has the opportunity to offer affordable and customized automation systems that help these businesses save time, improve customer response, and increase operational efficiency. Since more businesses are shifting to digital platforms, the demand for automation services is expected to grow.

I.6. Risk

The possible risks of CoreNode Solutions Corp. include strong competition from global automation platforms, changes in social media and third-party API policies, cybersecurity threats, and possible client budget limitations. The company may also experience lower growth if clients choose cheaper do-it-yourself tools instead of fully managed automation services.

I.7. Management Team

CoreNode Solutions Corp. will be managed by six executive officers who will handle the major areas of the business, including executive management, technology development, operations, finance, marketing, and administration.

Member Name	Position	Department
Bughaw, Karl Benjamin	Chief Executive Officer / Chairman	Executive Management and Strategic Direction
Pablo, Jhanric Hanamichi	Chief Technology Officer / President	Technology Development and System Architecture
Bonifacio, Shane Leonard	Chief Operations Officer / Vice President	Operations and Client Project Implementation
Ferrer, Jan Lambert	Chief Financial Officer / Treasurer	Finance, Budgeting, and Capital Management
Mortel, Jay Mark	Chief Marketing Officer / Corporate Secretary	Marketing, Sales, and Client Acquisitions
Azuela, Benz Robinson	Chief Administrative Officer / Assistant Corporate Secretary	Human Resources, Compliance, and Administration

I.8. Capital

Each member of CoreNode Solutions Corp. will contribute ₱2,000,000 as their capital share. The total initial capital of the corporation will be ₱12,000,000.

Member Name	Capital Share
Bughaw, Karl Benjamin	₱ 2,000,000
Pablo, Jhanric Hanamichi	₱ 2,000,000
Bonifacio, Shane Leonard	₱ 2,000,000
Ferrer, Jan Lambert	₱ 2,000,000
Mortel, Jay Mark	₱ 2,000,000
Azuela, Benz Robinson	₱ 2,000,000
Total Capital	₱ 12,000,000

I.9. Projected Number of Employees

CoreNode Solutions Corp. will start with a projected total of 60 employees. This number is aligned with the company's nature as a technology service provider that requires software developers, automation engineers, project staff, finance personnel, marketing staff, and administrative employees.

Executive / Department	Head	Project Employees
Executive Management Office	Bughaw, Karl Benjamin	5
Technology Department	Pablo, Jhanric Hanamichi	18
Operations Department	Bonifacio, Shane Leonard	12
Finance Department	Ferrer, Jan Lambert	6
Marketing and Sales	Mortel, Jay Mark	11
Administrative and HR	Azuela, Benz Robinson	8
Total Projected Employees		60 employees

II. Company Profile

II.1. Name of Corporation

CoreNode Solutions Corp.

II.2. Business or Trade Name

CoreNode

II.3. Location / Address

Unit 1402, Ayala Tower One, Ayala Avenue, Makati City, 1226 Philippines

II.4. Product or Service

Product / Service	Description
Order Node	Automated sales and invoicing system that records customer orders, generates invoices, and tracks payment status.
Support Node	Logic-based customer response system that answers frequently asked questions, collects customer concerns, and forwards complex issues to human staff.
Social Node	Automated lead capture and CRM integration service that collects inquiries from social media pages, websites, and online forms.
Managed Core Maintenance	Monthly support service that includes system monitoring, bug fixing, backup checking, and technical assistance.

II.5. Logo with Description

The logo of CoreNode Solutions Corp. represents the company's focus on business automation, digital connection, and reliable technology systems. The central hexagon symbolizes the "Core," which acts as the main system that organizes and controls business processes, while the smaller connected circles represent the "Nodes," or the different services offered by the company such as sales automation, customer support, lead management, and system maintenance. The blue color palette reflects trust, professionalism, security, and innovation, which are essential qualities in the technology industry, while the glowing connection lines symbolize smooth communication and data flow between business functions. Overall, the logo communicates that CoreNode Solutions Corp. helps businesses connect, automate, and manage their operations more efficiently.

II.6. Composition of the Board of Directors

Board / Officer Position	Name
Chairman	Bughaw, Karl Benjamin
President	Pablo, Jhanric Hanamichi
Vice President	Bonifacio, Shane Leonard
Treasurer	Ferrer, Jan Lambert
Corporate Secretary	Mortel, Jay Mark
Assistant Corporate Secretary	Azuela, Benz Robinson

II.7. Paid-up Capital

Member Name	Paid-up Capital
Bughaw, Karl Benjamin	₱ 2,000,000
Pablo, Jhanric Hanamichi	₱ 2,000,000
Bonifacio, Shane Leonard	₱ 2,000,000
Ferrer, Jan Lambert	₱ 2,000,000
Mortel, Jay Mark	₱ 2,000,000
Azuela, Benz Robinson	₱ 2,000,000
Total Paid-up Capital	₱ 12,000,000

II.8. Vision

To become one of the leading providers of business automation solutions for MSMEs and digital businesses in the Philippines by 2030.

II.9. Mission

To help businesses improve efficiency by providing customized, reliable, and easy-to-use automation systems for sales, customer support, lead management, and maintenance.

II.10. Objectives

- To onboard at least 100 MSME clients within the first year of operation.
- To achieve at least 15% annual revenue growth for the first five years.
- To maintain at least 99% system uptime for all active client automation systems.
- To reduce client manual processing time by at least 30% within six months of system implementation.
- To expand service coverage to other major business districts in the Philippines within five years.

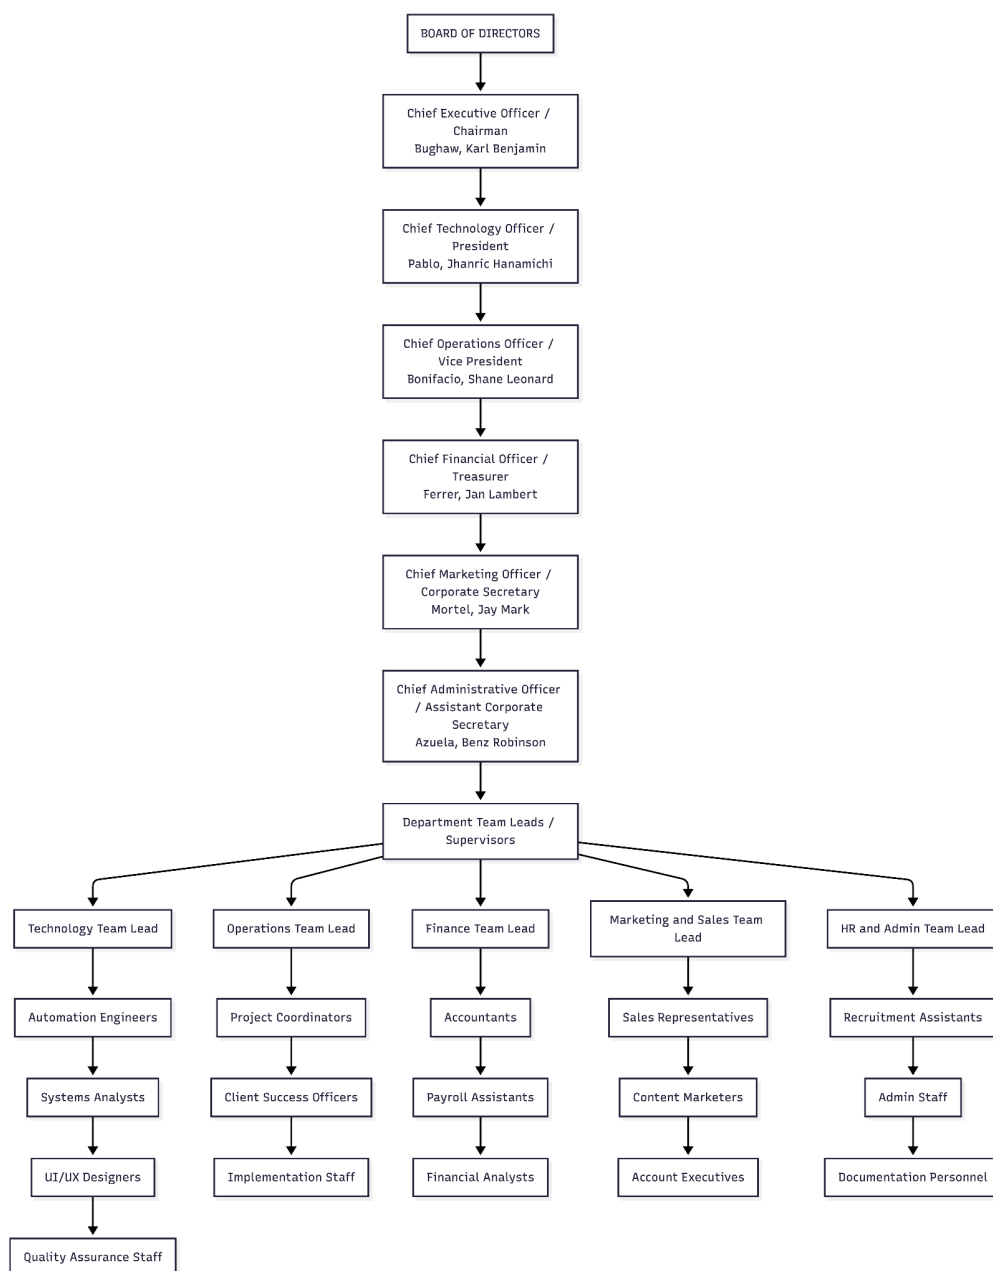

III. Management Aspect

III.1. Company Policy / Rules and Regulations

CoreNode Solutions Corp. requires all employees to follow company policies on professionalism, confidentiality, and attendance, data privacy, and quality service. Employees must complete their assigned tasks on time, protect client information, use company equipment properly, and communicate respectfully with clients, and co-workers. Violations of company rules may result in a verbal warning, written warning, suspension, or termination depending on the seriousness of the offense.

III.2. Organization Chart

The organizational chart of CoreNode Solutions Corp. follows this structure:

III.3. Organization Structure

CoreNode Solutions Corp. will use a tall organizational structure to maintain clear authority, proper supervision, and organized reporting. The Board of Directors and Chief Executive Officer will provide the main direction of the company, while the President and other executive officers will manage their assigned departments.

Each department will have supervisors or team leads who will directly guide employees in daily operations. The Operations Department will handle client onboarding and project implementation. The Finance Department will manage budgets, payroll, and financial records. The Marketing and Sales Department will focus on promotion, partnerships, and client acquisition. The Administrative and HR Department will manage employee records, compliance, recruitment, and office support.

This structure allows the company to monitor project quality, employee performance, client concerns, and technical output more effectively.

III.4. Job Description

Position	Job Description
Chief Executive Officer / Chairman	Leads the entire company, approves major decisions, sets business goals, and ensures that all departments follow the company's vision and mission.
Chief Technology Officer / President	Oversees software development, automation architecture, system security, API integration, and technical innovation.
Chief Operations Officer / Vice President	Manages daily operations, project implementation, client onboarding, service delivery, and coordination between departments.
Chief Financial Officer / Treasurer	Handles budgeting, payroll, financial reports, capital allocation, pricing analysis, and expense monitoring.

Chief Marketing Officer / Corporate Secretary	Leads marketing campaigns, sales strategies, client acquisition, partnerships, and corporate communication records.
Chief Administrative Officer / Assistant Corporate Secretary	Manages human resources, employee records, compliance documents, office administration, and internal policies.
Technology Team Lead	Supervises automation engineers, system analysts, UI / UX designers, and quality assurance staff.
Operations Team Lead	Supervises project coordinators, client success officers, and implementation staff.
Finance Team Lead	Supervises accountants, billing staff, payroll assistants, and financial analysts.
Marketing and Sales Team Lead	Supervises sales representatives, content marketers, account executives, and customer acquisition staff.
HR and Admin Team Lead	Supervises recruitment assistants, admin staff, office clerks, and documentation personnel.
Automation Engineer	Builds, tests, and maintains automation workflows based on client needs.
Systems Analyst	Studies the client's business process and identifies tasks that can be automated.
UI / UX Designer	Designs client dashboards, forms, and user interfaces for automation systems.
Quality Assurance Staff	Tests the system before deployment and ensures that all functions work properly.
Project Coordinator	Assists in project scheduling, task tracking, and coordination between clients and technical staff.

Client Success Officer	Communicates with clients, monitors satisfaction, and assists with service concerns.
Accountant	Prepares financial reports, records expenses, and monitors company transactions.
Payroll Assistant	Processes employee salaries, benefits, and payroll-related documents.
Sales Representative	Presents company services to potential clients and assists in closing sales
Content Marketer	Creates promotional materials, social media contents, and marketing campaigns.
Recruitment Assistant	Assists in hiring, application screening, and employee onboarding.
Admin Staff	Handles documentation, office supplies, filing, and other administrative tasks.

III.5. Minimum Qualifications

Position / Department	Minimum Qualifications
Executive Officers	Bachelor's degree in Business Administration, Information Technology, Computer Science, Management, Finance, Marketing, or any related field. Must have leadership skills, decision-making skills, and knowledge of business operations.
Technology Staff	Bachelor's degree in Information Technology, Computer Science, Software Engineering, or related field. Must have knowledge of programming, databases, API integration, automation tools, and basic cybersecurity.
Operations Staff	Bachelor's degree in Business Administration, Information Technology, Operations Management, or related field.

	Must have organizational skills, communication skills, and project coordination skills.
Finance Staff	Bachelor's degree in Accountancy, Finance, Business Administration, or related field. Must have knowledge of budgeting, bookkeeping, payroll, and financial reporting.
Marketing and Sales	Bachelor's degree in Marketing, Business Administration, Communication, or related field. Must have skills in sales, client communication, digital marketing, and customer relationship management.
HR and Admin	Bachelor's degree in Human Resource Management, Psychology, Business Administration, Office Administration, or related field. Must have skills in documentation, recruitment, employee relations, and office management.

III.6. Duties and Responsibilities

All Employees of CoreNode Solutions Corp. are responsible for performing their assigned tasks professionally and efficiently. They must follow company policies, protect client information, and complete duties within the required deadline.

Department	Duties & Responsibilities	Consequences if Not Accomplished
Executive Management	Set company direction, approve major plans, and monitor departmental performance.	Poor leadership may result in delayed decisions, low company performance, and board review.
Technology Department	Develop, test, secure, and maintain client automation systems.	Failure may cause system errors, client dissatisfaction, written warning, or disciplinary action.

Operations Department	Manage client onboarding, implementation schedules, and project monitoring.	Failure may cause project delays, client complaints, and performance review.
Finance Department	Prepare budgets, payroll, invoices, and financial reports.	Failure may cause inaccurate records, delayed salary processing, and disciplinary actions.
Marketing and Sales Department	Promote company services, generate leads, communicate with clients, and support sales growth.	Failure may result in low sales performance, lost clients, and performance evaluation.
Administrative and HR Department	Manage employee records, recruitment, documentation, office supplies, and compliance.	Failure may cause administrative delays, incomplete records, and written warnings.

Employees who fail to accomplish their tasks may receive a verbal warning for minor violations, a written warning for repeated mistakes, suspension for serious negligence, or termination for major violations that harm the company or its clients.

III.7. Salaries and Wages

The salary structure of CoreNode Solutions Corp. is designed to be competitive for a technology service company. The lowest salary is above the estimated minimum wage to attract qualified employees and support employee retention.

Position	Monthly Salary
Chief Executive Officer / Chairman	₱ 150,000
Chief Technology Officer / President	₱ 140,000
Chief Operations Officer / Vice President	₱ 125,000

Chief Financial Officer / Treasurer	₱ 120,000
Chief Marketing Officer / Corporate Secretary	₱ 115,000
Chief Administrative Officer / Assistant Corporate Secretary	₱ 110,000
Department Team Lead	₱ 70,000
Senior Automation engineer	₱ 65,000
System Analyst	₱ 55,000
UI / UX Designer	₱ 50,000
Quality Assurance Staff	₱ 45,000
Project Coordinator	₱ 42,000
Client Success Officer	₱ 40,000
Accountant	₱ 38,000
Payroll Assistant	₱ 32,000
Sales Representative	₱ 35,000
Content Marketer	₱ 34,000
Recruitment Assistant	₱ 30,000
Admin Staff	₱ 28,000

IV. Technical Aspect

IV.1. Product Concept

The product concept of CoreNode Solutions Corp. is “Frictionless Growth Through Automation.” The company provides customized automation systems that help businesses reduce repetitive tasks, improve customer response, organize sales records, and monitor business operations through digital tools.

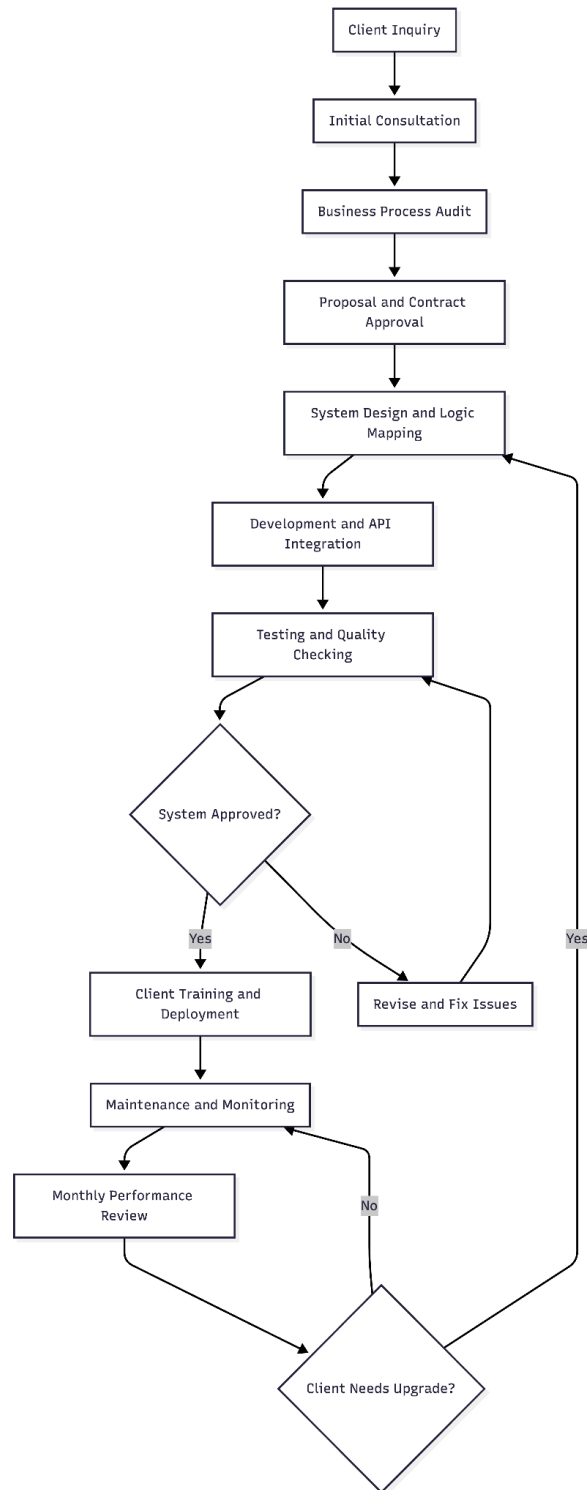

Instead of selling only software access, CoreNode Solutions Corp. provides a done-for-you automation service where the company designs, develops, implements, and maintains the automation system for the client.

IV.2. Unique Selling Point

The unique selling point of CoreNode Solutions Corp. is its fully managed and customized automation service. Unlike do-it-yourself automation platforms, CoreNode does not require clients to build the system themselves. The company studies the client’s business process, designs the workflow, develops the automation system, trains the client, and provides continuous maintenance.

This makes the service suitable for MSMEs and business owners who need automation but do not have the technical knowledge or time to build systems on their own.

IV.3. Flowchart

The process starts when a client sends an inquiry. After the consultation and business process audit, the company prepares a proposal and contract. Once approved, the Technology Department designs the logic flow, develops the system, tests it, and deploys it to the client. After deployment, the company provides maintenance, monitoring, and monthly performance review.

IV.4. Raw Material

Since CoreNode Solutions Corp. is a service and software-based company, its raw materials are mainly digital resources and technical tools rather than physical materials.

- Cloud infrastructure subscriptions
- API access keys for supported platforms
- Software development frameworks
- Licensed automation tools
- Database systems
- Cybersecurity tools
- Design assets and UI components
- Client process information and business requirements

IV.5. Machinery and Equipment

The company will use equipment that supports software development, system monitoring, client communication, and digital operations.

- High-performance laptops and desktop computers
- External monitors
- Local servers or network-attached storage
- Routers and network switches
- Backup power supply / UPS units
- Biometric access system
- Printers and scanners
- Conference room display screen
- Headsets and webcams for online meetings
- Office telephones or VoIP devices

IV. 6. Packaging

Since CoreNode Solutions Corp. provides a service, its packaging will focus on the complete digital service experience given to clients. Each client package may include consultation, system setup, free installation, user training, technical documentation, 12-month technical warranty, and scheduled maintenance support.

The company may offer the following service packages:

Package	Inclusions
Starter Node Package	Basic automation setup for small businesses, including one automation workflow and basic dashboard access.
Business Node Package	Multiple automation workflows, CRM integration, customer support automation, and monthly monitoring.
Enterprise Core Package	Full automation system, advanced dashboard, API integration, technical consultation, priority support, and regular performance review.
Managed Core Maintenance	Monthly system monitoring, bug fixing, data backup checking, and technical assistance.

IV.7. Office Supplies

- Bond paper
- Folders and envelopes
- Ballpens and markers
- Notebooks and sticky notes
- Printer ink and toner
- Filing cabinets
- Whiteboards
- Extension cords
- Desk organizers
- Cleaning supplies
- Employee ID supplies
- Office forms and documentation materials

IV.8. Utilities

The company will require utilities that support digital work, system development, client communication, and continuous monitoring.

- Electricity
- Water supply
- Office lighting
- Air conditioning

- Dual fiber internet connection
- Backup internet connection
- VoIP telephone service
- Cloud server subscription
- Email hosting
- Software subscription services
- Backup power generator or UPS

IV.9. Delivery Equipment

CoreNode Solutions Corp. delivers its services digitally through cloud-based platforms, online dashboards, remote deployment, and client access portals. Since the company does not sell or transport physical products, delivery equipment is not required.

IV.10. Quality Measure

CoreNode Solutions Corp. will maintain quality by applying proper testing, monitoring, and review procedures before and after system deployment. Every automation system must pass functionality testing, user acceptance testing, security checking, and performance monitoring before being delivered to the client.

Quality measures include the following:

- System testing before deployment
- User acceptance testing with the client
- Code review by senior technical staff
- Monthly system performance monitoring
- Backup checking and recovery testing
- Security review and access control checking
- Client feedback collection
- Service level agreement monitoring
- Regular maintenance reports

IV.11. Safety Measure

The company will implement safety measures to protect both employees and users. Since CoreNode Solutions Corp. handles client business data, cybersecurity and data privacy will be treated as major safety priorities.

Safety measures include the following:

- Use of SSL/TLS encryption for online systems
- Secure user login and password protection
- Role-based access control for employees and clients
- Regular data backup
- Employee training on cybersecurity and data privacy
- Biometric access for restricted office areas
- Fire extinguishers and emergency exits in the office
- Proper cable management to avoid accidents
- Use of UPS units to prevent data loss during power interruptions
- Regular maintenance of office equipment and electrical systems

IV.12. Layout

V. Legal Aspect

V.1. Legal Documents
